U.S. Patent No. 4,977,455 Young
European Publ. Appl. 0 209 703 A1 Belisomi
Pat. Abs. of Japan, vol. 12, no. 246 re JP-A-63 036 608

The Bonneau et al., Hakamada et al., Duffield ('517), Belisomi (European) and Patent Abstracts of Japan references are all relevant in that they were cited in the Search Report issued in connection with European Patent Application No. 90 30 5932 which corresponds to and claims priority from the application for the U.S. Patent which is the subject of this reissue application.

The published Search Report itself, EP 0 401 015 A3, is submitted herewith for the convenience of the Examiner.

The remaining references, with the exception of Belisomi et al. ('918) were cited in the application of the patent for which reissue is sought, U.S. Patent No. 5,045,947, or in the file of the parent application thereto, now U.S. Patent No. 5,068,734.

The Examiner's attention is drawn to the fact that the patent issuing on the above-mentioned parent application, U.S. Patent No. 5,068,734, was reexamined as Reexam. No. 90/002829. Reexamination Certificate No. B1 5,068,734 issued October 26, 1993. Reexamination was requested by the patent owner in view of the Belisomi et al ('918) and Belisomi (European) references.

Form PTO-1449 is attached hereto, and copies of the cited references are submitted herewith.

Respectfully submitted,

Thomas A. Boshinski
